Batoul Rostom

Doctorante

Équipe 3 : Chimie Moléculaire

Thématisques de recherche : Chimie médicinale

After a diploma in General Biochemistry, I had a master degree in Human Reproductive Biology: Medical Aids and Embryonic Development from the Lebanese University, Lebanon. Since September 2019, I am enrolled in codirectional thesis between the Lebanese University at Lebanon and Le CNAM at Paris under the supervision of Dr Issam Kassab, Dr Racha Karaky and Dr Maite Sylla. My thesis focuses on the production off new anticancer coumarinic compound and their biological evaluation
